

### TO WHOM IT MAY CONCERN

I recommend **Anjali Kaushik** as a candidate for employment. Anjali did a one-month internship and one-month of open source work with us as a Flutter Developer.

She did an excellent job and was very productive for the company. Moreover, she has excellent communication skills and is organized, reliable and hard-working. She can work independently and is able to follow through to make sure that the job is done. She is flexible and willing to work on any project that is assigned to her. She was quick to volunteer to assist in other areas of the company operations as well. The best part is she is a quick learner, she was able to learn flutter in a span of 2 weeks and make 3 applications(Engineering Times application to manage webinars, a highly secured chatting system and a mobile to mobile file-sharing application called mShare) with the course of 2 months.

She would be a tremendous asset to your company and has my highest recommendation. If you have any further questions regarding her background or qualifications, please do not hesitate to write to me ([nivedit@mathrithms.com](mailto:nivedit@mathrithms.com)).
